C4TALENT

Where Talent Meets Opportunity: Building Thriving Business Ecosystems

C4TALENT is about creating a business & startup friendly environment in cities to lessen the effects of brain drain, attracting and retaining talented young professionals. Offering funding, physical infrastructure like co-working spaces and incubators, and the city itself as a testbed are all effective methods. However, there is no one-size-fits-all solution: each city needs to design its own unique combination of key aspects for a local startup ecosystem.
